

Numbers of mesothelioma cases and controls who worked for at least 5 years before 1992 in each occupational category.
 Men and women with any exposure in higher risk* occupational categories are excluded in the right-hand part of the table.

<i>Occupational category</i>	<i>All</i>		<i>Excluding those who worked in higher risk* categories</i>	
	<i>Cases</i>	<i>Controls</i>	<i>Cases</i>	<i>Controls</i>
Males				
Primary & secondary school teachers	5	39	3	27
Other school workers	0	1	0	1
Higher Education teachers & workers	2	25	0	13
Reference group¹	23	242	23	242
Females				
Primary & secondary school teachers	7	21	6	20
Other school workers	6	11	4	10
Higher Education teachers & workers	4	4	3	3
Reference group¹	58	172	58	172

¹ The reference group worked only in non-industrial jobs (excluding teaching), or in low risk industrial jobs for less than 5 years.

* Medium risk industrial jobs and higher, and those with more than 5 years work in low risk industrial jobs
